NAME

XtInitializeWidgetClass – initialize a widget class

SYNTAX

#include <X11/Intrinsic.h>

void XtInitializeWidgetClass(WidgetClass *object_class*);

ARGUMENTS

object_class   Specifies the object class to initialize.

DESCRIPTION

If the specified widget class is already initialized, **XtInitializeWidgetClass** returns immediately.

If the class initialization procedure registers type converters, these type converters are not available until the first object of the class or subclass is created or **XtInitializeWidgetClass** is called.
