NAME

gtk-query-immodules-3.0 – Input method module registration utility

SYNOPSIS

gtk−query−immodules−3.0 [−−update−cache] [MODULE...]

DESCRIPTION

gtk−query−immodules−3.0 collects information about loadable input method modules for GTK+ and writes it to the default cache file location, or to stdout.

If called without arguments, it looks for modules in the GTK+ input method module path.

If called with arguments, it looks for the specified modules. The arguments may be absolute or relative paths.

Normally, the output of **gtk−query−immodules−3.0** is written to *libdir*/gtk−3.0/3.0.0/immodules.cache, where GTK+ looks for it by default. If it is written to some other location, the **GTK_IM_MODULE_FILE** environment variable can be set to point GTK+ at the file.

OPTIONS

−−update−cache
  Write the output to the default cache location instead of stdout

FILES

libdir/gtk−3.0/3.0.0/immodules.cache
  The default im cache file used by GTK+ applications

ENVIRONMENT

GTK_PATH
  Prepends directories to the input method module path

GTK_IM_MODULE_FILE
  Specifies an alternative im module cache for GTK+ applications
