NAME
>   **npm-star** – Mark your favorite packages

Synopsis
>   npm star [<pkg>...]

>   Note: This command is unaware of workspaces.

Description
>   "Starring" a package means that you have some interest in it. It's a vaguely positive way to show that you care.

>   It's a boolean thing. Starring repeatedly has no additional effect.

More
>   There's also these extra commands to help you manage your favorite packages:

Unstar
>   You can also "unstar" a package using npm help **unstar**

>   "Unstarring" is the same thing, but in reverse.

Listing stars
>   You can see all your starred packages using npm help **stars**

Configuration
>   <!−− AUTOGENERATED CONFIG DESCRIPTIONS START −−> <!−− automatically generated, do not edit manually −−> <!−− see lib/utils/config/definitions.js −−>

registry
>   • Default: "https://registry.npmjs.org/"

>   • Type: URL

>   The base URL of the npm registry. <!−− automatically generated, do not edit manually −−> <!−− see lib/utils/config/definitions.js −−>

unicode
>   • Default: false on windows, true on mac/unix systems with a unicode locale, as defined by the **LC_ALL**, **LC_CTYPE**, or **LANG** environment variables.

>   • Type: Boolean

>   When set to true, npm uses unicode characters in the tree output. When false, it uses ascii characters instead of unicode glyphs. <!−− automatically generated, do not edit manually −−> <!−− see lib/utils/config/definitions.js −−>

>   <!−− AUTOGENERATED CONFIG DESCRIPTIONS END −−>
