SYNOPSIS
devlink [*OPTIONS*] **link** { *COMMAND* | **help** }

OPTIONS := { **−V**[*ersion*] | **−d**[*etails*] }

rdma link show [*DEV/PORT_INDEX*]

rdma link add NAME type TYPE netdev NETDEV

rdma link delete NAME

rdma link help

DESCRIPTION
rdma link show - display rdma link attributes
DEV/PORT_INDEX - specifies the RDMA link to show. If this argument is omitted all links are listed.

rdma link add NAME type TYPE netdev NETDEV - add an rdma link for the specified type to the network device
NAME - specifies the new name of the rdma link to add

TYPE - specifies which rdma type to use. Link types:

>> **rxe** - Soft RoCE driver

>> **siw** - Soft iWARP driver

NETDEV - specifies the network device to which the link is bound

rdma link delete NAME - delete an rdma link
NAME - specifies the name of the rdma link to delete

EXAMPLES
rdma link show
> Shows the state of all rdma links on the system.

rdma link show mlx5_2/1
> Shows the state of specified rdma link.

rdma link add rxe_eth0 type rxe netdev eth0
> Adds a RXE link named rxe_eth0 to network device eth0

rdma link del rxe_eth0
> Removes RXE link rxe_eth0
