NAME

Locale::Recode::_Aliases – Internal Charset Alias Database for libintl−perl

SYNOPSIS

use Locale::Recode::_Aliases

die ''This module is internal to libintl. Do not use it directly!\n'';

DESCRIPTION

Contains a list of codeset aliases that are known internally to libintl.

CONSTANTS

ALIASES

The constant **Locale::Recode::_Aliases::ALIASES** contains a hash reference the keys of which are internally known charset alias names all in uppercase. The corresponding value is the canonical name of the charset.

BUGS

The format of the lookup table will most probably change, do not rely on the current format!
