NAME

XML::XPathEngine::Boolean – Boolean true/false values

DESCRIPTION

XML::XPathEngine::Boolean objects implement simple boolean true/false objects.

API

XML::XPathEngine::Boolean−>True

Creates a new Boolean object with a true value.

XML::XPathEngine::Boolean−>False

Creates a new Boolean object with a false value.

value()

Returns true or false.

to_literal()

Returns the string ``true'' or ``false''.
