NAME

vlc-wrapper − a wrapper to drop privileges with VLC

SYNOPSIS

vlc-wrapper [*OPTIONS*]

DESCRIPTION

This manual page documents briefly the **VLC** wrapper to open privileged network ports. The ports it can open are 80, 443 and 554.

OPTIONS

They will be passed to **VLC** with no modification.

USAGE

The preferred way is to use **sudo** :

$ sudo vlc-wrapper −−option1 −−option2

You can also set the SUDO_UID environment variable:

SUDO_UID=1000 vlc-wrapper −−option1 −−option2

SEE ALSO

vlc(1), **sudo**(8)

AUTHOR

This manual page was written by Christophe Mutricy.
