NAME

　　　　XtToolkitThreadInitialize – initialize the toolkit for multiple threads

SYNTAX

　　　　#include <X11/Intrinsic.h>

　　　　Boolean XtToolkitThreadInitialize(void);

DESCRIPTION

　　　　If **XtToolkitThreadInitialize** was previously called, it returns. The application programmer must ensure that two or more threads do not simultaneously attempt to call **XtToolkitThreadInitialize**; the effect of this is undefined. **XtToolkitThreadInitialize** returns **True** if the host operating system has threads and the Intrinsics are thread safe.
