NAME

PCRE2 - Perl-compatible regular expressions (revised API)

SYNOPSIS

#include <pcre2.h>

void pcre2_general_context_free(pcre2_general_context *gcontext**);**

DESCRIPTION

This function frees the memory occupied by a general context, using the memory freeing function within the context, if set. If the argument is NULL, the function returns immediately without doing anything.

There is a complete description of the PCRE2 native API in the **pcre2api** page and a description of the POSIX API in the **pcre2posix** page.
