NAME
>   init_selinuxmnt − initialize the global variable selinux_mnt

SYNOPSIS
>   **static void init_selinuxmnt(void);**
>
>   **static void fini_selinuxmnt(void);**
>
>   **void set_selinuxmnt(char ****mnt***);**

DESCRIPTION
>   **init_selinuxmnt**() initializes the global variable *selinux_mnt* to the selinuxfs mountpoint.
>
>   **fini_selinuxmnt**() deinitializes the global variable *selinux_mnt* that stores the selinuxfs mountpoint.
>
>   **set_selinuxmnt**() changes the selinuxfs mountpoint to *mnt*.
