NAME
       tcltk−depends – calculates Tcl/Tk dependencies

SYNOPSIS
       tcltk-depends [*debhelper options*]

DESCRIPTION
       tcltk-depends is a debhelper-like program which is responsible for generating the ${libtclXY:Depends},
       ${libtkXY:Depends}, ${libtcl:Depends}, ${libtk:Depends}, ${tclXY:Depends}, ${tkXY:Depends},
       ${tcl:Depends} and ${tk:Depends} substitution variables and adding them to substvars files.

       If you use this program, your package must build-depend on tcl-dev or tk-dev. If you use ${tclXY:De-
       pends} or ${tkXY:Depends} variables, your package must build-depend on tcl-dev (>= 8.6.0+7) or tk-dev
       (>= 8.6.0+7). If you use ${libtclXY:Depends}, ${libtkXY:Depends}, ${libtcl:Depends} or {libtk:De-
       pends} variables, your package must build-depend on tcl-dev (>= 8.6.0+9) or tk-dev (>= 8.6.0+9).

SEE ALSO
       debhelper (7), /usr/share/doc/tcl-doc/tcltk-policy.txt.gz

       This program is not a part of debhelper.
