NAME

selinux_restorecon_set_exclude_list – set list of directories to be excluded from relabeling.

SYNOPSIS

#include <selinux/restorecon.h>

void selinux_restorecon_set_exclude_list(const char ***exclude_list***);**

DESCRIPTION

selinux_restorecon_set_exclude_list() passes to **selinux_restorecon**(3) a pointer containing a **NULL** terminated list of one or more directories that are not to be relabeled in *exclude_list*.

selinux_restorecon_set_exclude_list() must be called prior to **selinux_restorecon**(3).
