NAME

g-ir-generate – Typelib generator

SYNOPSIS

g−ir−generate [OPTION...] FILES...

DESCRIPTION

g−ir−generate is an GIR generator, using the repository API. It generates GIR files from a raw typelib or in a shared library (−−**shlib**). The output will be written to standard output unless the −−**output** is specified.

OPTIONS

−−**help**   Show help options

−−**shlib=**_FILENAME_

The shared library to read the symbols from.

−−**output=**_FILENAME_

Save the resulting output in FILENAME.

−−**version**

Show program's version number and exit

BUGS
