NAME

mailto.conf – configuration file for cups email notifier

DESCRIPTION

The **mailto.conf** file defines the local mail server and email notification preferences for CUPS.

Each line in the file can be a configuration directive, a blank line, or a comment. Configuration directives typically consist of a name and zero or more values separated by whitespace. The configuration directive name and values are case-insensitive. Comment lines start with the # character.

DIRECTIVES

Cc *cc-address@domain.com*
> Specifies an additional recipient for all email notifications.

From *from-address@domain.com*
> Specifies the sender of email notifications.

Sendmail *sendmail command and options*
> Specifies the sendmail command to use when sending email notifications. Only one *Sendmail* or *SMTPServer* line may be present in the **mailto.conf** file. If multiple lines are present, only the last one is used.

SMTPServer *servername*
> Specifies a SMTP server to send email notifications to. Only one *Sendmail* or *SMTPServer* line may be present in the **mailto.conf** file. If multiple lines are present, only the last one is used.

Subject *subject-prefix*
> Specifies a prefix string for the subject line of an email notification.
