NAME

select-editor – select your default sensible-editor from all installed editors

SYNOPSIS

select-editor

DESCRIPTION

select-editor provides a coherent mechanism for selecting and storing a preferred sensible-editor on a per-user basis. It lists the available editors on a system and interactively prompts the user to select one. The results are stored as SELECTED_EDITOR variable in ˜/.selected_editor, which is sourced and used by **sensible-editor** command. SELECTED_EDITOR variable is overridden by the VISUAL and EDITOR environment variables.

AUTHOR

select-editor was written by Dustin Kirkland <kirkland@canonical.com>.
