NAME

gst−device−monitor−1.0 – Simple command line testing tool for GStreamer device monitors

SYNOPSIS

gst−device−monitor−1.0 *[DEVICE_CLASSES[:FILTER_CAPS]] [DEVICE_CLASSES[:FILTER_CAPS]]*

DESCRIPTION

gst−device−monitor−1.0 is a command line tool that can be used to test GStreamer's device monitoring functionality. By default it will just print a list of all devices found and exit, but you can also make it wait around for more devices by passing the −−follow option. You can also pass it one or more filter arguments to filter the kind of devices you are interested in.

OPTIONS

gst−device−monitor−1.0 accepts the following options:

−−help   Print help synopsis and available command line options

−−version
    Print version and exit

−f, −−follow
    Don't exit after showing the initial device list, but wait for devices to be added or removed

−i, −−include−hidden
    Include devices from hidden device providers.

EXAMPLES

gst−device−monitor−1.0

gst−device−monitor−1.0 --follow

gst−device−monitor−1.0 Audio/Source

gst−device−monitor−1.0 Video/Source:video/x-raw

gst-device-monitor-1.0 -i Audio/Sink
