NAME
>   ncurses6-config − helper script for ncurses libraries

SYNOPSIS
>   **ncurses6-config** [*options*]

DESCRIPTION
>   This is a shell script which simplifies configuring applications against a particular set of ncurses libraries.

OPTIONS
>   **−−prefix**
>>   echos the package−prefix of ncurses
>
>   **−−exec−prefix**
>>   echos the executable−prefix of ncurses
>
>   **−−cflags**
>>   echos the C compiler flags needed to compile with ncurses
>
>   **−−libs**   echos the libraries needed to link with ncurses
>
>   **−−version**
>>   echos the release+patchdate version of ncurses
>
>   **−−abi−version**
>>   echos the ABI version of ncurses
>
>   **−−mouse−version**
>>   echos the mouse−interface version of ncurses
>
>   **−−bindir**
>>   echos the directory containing ncurses programs
>
>   **−−datadir**
>>   echos the directory containing ncurses data
>
>   **−−includedir**
>>   echos the directory containing ncurses header files
>
>   **−−libdir**
>>   echos the directory containing ncurses libraries
>
>   **−−mandir**
>>   echos the directory containing ncurses manpages
>
>   **−−terminfo**
>>   echos the $TERMINFO terminfo database path, e.g.,
>>   /etc/terminfo
>
>   **−−terminfo−dirs**
>>   echos the $TERMINFO_DIRS directory list, e.g.,
>>   /etc/terminfo:/lib/terminfo:/usr/share/terminfo
>
>   **−−termpath**
>>   echos the $TERMPATH termcap list, if support for termcap is configured.
>
>   **−−help**   prints this message
