NAME

winefile – Wine File Manager

SYNOPSIS

winefile *path*

DESCRIPTION

winefile is the Wine file manager, with a similar design to early Microsoft Windows explorer.

USAGE

You can pass winefile either a Unix or Win32 path, for example:

Using a Unix path: **winefile /mnt/hda1**

Using a Win32 path: **winefile C:\\\windows**

BUGS

Bugs can be reported on the **Wine bug tracker** ⟨https://bugs.winehq.org⟩.

AVAILABILITY

winefile is part of the Wine distribution, which is available through WineHQ, the **Wine development headquarters** ⟨https://www.winehq.org/⟩.
