Glib::Param::Int – Paramspecs for integer types

DESCRIPTION

This page documents the extra accessors available for all of the integer type paramspecs: Char, Int, and Long. Perl really only supports full-size integers, so all of these methods return IVs; the distinction of integer size is important to the underlying C library and also determines the data value range.

METHODS

integer = $pspec−>**get_maximum**

integer = $pspec−>**get_minimum**
