NAME

systemd-binfmt.service, systemd-binfmt − Configure additional binary formats for executables at boot

SYNOPSIS

systemd−binfmt.service

/lib/systemd/systemd−binfmt

DESCRIPTION

systemd−binfmt.service is an early boot service that registers additional binary formats for executables in the kernel.

See **binfmt.d**(5) for information about the configuration of this service.

OPTIONS

−−unregister

If passed, instead of registering configured binary formats in the kernel, the reverse operation is executed: all currently registered binary formats are unregistered from the kernel.

−−cat−config

Copy the contents of config files to standard output. Before each file, the filename is printed as a comment.

−−no−pager

Do not pipe output into a pager.

−h, **−−help**

Print a short help text and exit.

−−version

Print a short version string and exit.
