NAME
> pnmtoxwd - convert a portable anymap into an X11 window dump

SYNOPSIS
> **pnmtoxwd** [**-pseudodepth** *n*] [**-directcolor**] [*pnmfile*]

DESCRIPTION
> Reads a portable anymap as input. Produces an X11 window dump as output. This window dump can be displayed using the xwud tool.
>
> Normally, pnmtoxwd produces a StaticGray dump file for *pbm* and *pgm* files. For *ppm*, it writes a Pseudo-Color dump file if there are up to 256 colors in the input, and a DirectColor dump file otherwise. The **-directcolor** flag can be used to force a DirectColor dump. And the **-pseudodepth** flag can be used to change the depth of PseudoColor dumps from the default of 8 bits / 256 colors.
