NAME
IBUS – dconf database file for IBus

SYNOPSIS
/etc/dconf/db/ibus

DESCRIPTION
IBus is an Intelligent Input Bus. It is a new input framework for Linux OS. It provides full featured and user friendly input method user interface. It also may help developers to develop input method easily.

/etc/dconf/db/ibus is a database file dconf and saves the IBus default settings. It can be generated from /etc/dconf/db/ibus.d/00–upstream–settings by **dconf update** command with a write privilege in /etc/dconf/db. The saved keys and values can be read by dconf command.

    env DCONF_PROFILE=ibus dconf list /desktop/ibus/

BUGS
If you find a bug, please report it at https://github.com/ibus/ibus/issues
