NAME

selinux_getpolicytype – get the type of SELinux policy running on the system

SYNOPSIS

#include <selinux/selinux.h>

int selinux_getpolicytype(char ** *policytype* **);**

DESCRIPTION

selinux_getpolicytype() Reads the contents of the */etc/selinux/config* file to determine the SELinux policy used on the system, and sets *policytype* accordingly. Free *policytype* with **free**(3).

RETURN VALUE

On success, zero is returned. On failure, −1 is returned.
