NAME
      applygnupgdefaults – Run gpgconf --apply-defaults for all users.

SYNOPSIS
      applygnupgdefaults

DESCRIPTION
      This script is a wrapper around **gpgconf** to run it with the command **--apply-defaults** for all real users with
      an existing GnuPG home directory. Admins might want to use this script to update he GnuPG configura-
      tion files for all users after '*/etc/gnupg/gpgconf.conf*' has been changed. This allows enforcing certain poli-
      cies for all users. Note, that this is not a bulletproof way to force a user to use certain options. A user may
      always directly edit the configuration files and bypass gpgconf.

      applygnupgdefaults is invoked by root as:

          applygnupgdefaults
