NAME

srch_strings - display printable strings in files

SYNOPSIS

srch_strings [*options*] [*files*]

OPTIONS

-a   Scan the entire file, not just the data section.

-f   Print the name of the file before each string.

-n number, -number
    Locate and print any NUL-terminated sequence of at least number characters (default 4).

-t {o,x,d}
    Print the location of the string in base 8, 10 or 16.

-o   An alias for **--radix**=o.

-e {s,S,b,l,B,L}
    Select character size and endianness: s = 7-bit, S = 8-bit, {b,l} = 16-bit, {B,L} = 32-bit.

-h   Display command line help.

-v   Print the program's version number.
