NAME
      XtAppReleaseCacheRefs – decrement reference counts for resources

SYNTAX
      #include <X11/Intrinsic.h>

      void XtAppReleaseCacheRefs(XtAppContext *app_context*, XtCacheRef* *refs*);

ARGUMENTS
      app_context   Specifies the application context.

      refs   Specifies the list of cache references to be released.

DESCRIPTION
      XtAppReleaseCacheRefs decrements the reference count for the conversion entries identified by the *refs*
      argument. This argument is a pointer to a NULL-terminated list of **XtCacheRef** values. If any reference
      count reaches zero, the destructor, if any, will be called and the resource removed from the conversion
      cache.
