NAME
buddy-ng - a tool to work with easside-ng

SYNOPSIS
buddy-ng <options>

DESCRIPTION
buddy-ng server echoes back the decrypted packets to the system running easside-ng in order to access the wireless network without knowing the WEP key. It is done by having the AP itself decrypt the packets. When ran, it automatically starts and listen to port 6969.

OPTIONS

-h   Shows the help screen.

-p   Don't drop privileges
