NAME

dbxtool – modify the dbx revokation list

SYNOPSIS

dbxtool [CMD]

DESCRIPTION

This manual page documents briefly the **dbxtool** command.

dbxtool allows a user to operate on the UEFI dbx revokation list. This tool can be used to list the current dbx contents or update it to a newer version.

OPTIONS

The dbxtool command takes various options depending on the action. Run **dbxtool --help** for the full list.
