NAME

es2gears – ''gears'' demo for GLES2

SYNOPSIS

es2gears

DESCRIPTION

The *es2gears* program is a port of the ''gears'' demo to GLES2. It displays a set of rotating gears and prints out the frame rate at regular intervals. It has become quite popular as basic benchmarking tool.

AUTHOR

glxgears was written by Brian Paul <brian.paul@tungstengraphics.com>.

This manual page was written by Ricardo Salveti de Araujo <ricardo.salveti@canonical.com>, for the Debian project (but may be used by others).
