NAME

X11::Protocol::Connection::INETFH – Perl module for FileHandle–based TCP/IP X11 connections

SYNOPSIS

```
use X11::Protocol;
use X11::Protocol::Connection::INETFH;
$conn = X11::Protocol::Connection::INETFH
  ->open($host, $display_number);
$x = X11::Protocol->new($conn);
```

DESCRIPTION

This module is used by X11::Protocol to establish a connection and communicate with a server over an internet-type TCP/IP socket connection, using the FileHandle module.

AUTHOR

Stephen McCamant <SMCCAM@cpan.org>.
