NAME

npm-bugs – Report bugs for a package in a web browser

Synopsis

npm bugs [<pkgname> [<pkgname> ...]]

aliases: issues

Description

This command tries to guess at the likely location of a package's bug tracker URL or the **mailto** URL of the support email, and then tries to open it using the −−**browser** config param. If no package name is provided, it will search for a **package.json** in the current folder and use the **name** property.
