NAME

        XtGetDisplays − retrieve a list of displays associated with an application context

SYNTAX

        #include <X11/Intrinsic.h>

        void XtGetDisplays(XtAppContext *app_context*, Display ****dpy_return*, Cardinal* *num_dpy_return*);

ARGUMENTS

        app_context   Specifies the application context.

        dpy_return   Returns a list of open X display connections in the specified application context.

        num_dpy_return Returns the count of open X display connections in *dpy_return*.

DESCRIPTION

        To free the list of displays, use **XtFree**.
