NAME

flatpak-document-info − Show information about exported files

SYNOPSIS

flatpak document−info [OPTION...] FILE

DESCRIPTION

Shows information about an exported file, such as the document id, the fuse path, the original location in the filesystem, and the per−application permissions.

FILE can either be a file in the fuse filesystem at /run/user/$UID/doc/, or a file anywhere else.

OPTIONS

The following options are understood:

−h, **−−help**
Show help options and exit.

−v, **−−verbose**
Print debug information during command processing.

−−ostree−verbose
Print OSTree debug information during command processing.

EXAMPLES

$ flatpak document−info ˜/Sources/gtk/gail−3.0.pc

id: dd32c34a
path: /run/user/1000/doc/dd32c34a/gail−3.0.pc
origin: /home/mclasen/Sources/gtk/gail−3.0.pc
permissions:
org.gnome.gedit read, write
