NAME

info – readable online documentation

DESCRIPTION

The Info file format is an easily-parsable representation for online documents. It can be read by *emacs(1)* and *info(1)* among other programs.

Info files are usually created from *texinfo(5)* sources by *makeinfo(1)*, but can be created from scratch if so desired.

For a full description of the Texinfo language and associated tools, please see the Texinfo manual (written in Texinfo itself). Most likely, running this command from your shell:

```
info texinfo
```

or this key sequence from inside Emacs:

```
M-x info RET m texinfo RET
```

will get you there.

AVAILABILITY

http://www.gnu.org/software/texinfo/

REPORTING BUGS

Please send bug reports to bug-texinfo@gnu.org, general questions and discussion to help-texinfo@gnu.org.
