NAME

Date::Manip::DM5abbrevs – A list of all timezone abbreviations

SYNPOSIS

This module is not intended to be used directly. Date::Manip 5.xx will load it as needed.

This module contains all of the time zone abbreviations from Date::Manip 6.xx copied backwards to 5.xx to provide slightly better support for time zones.

Note that this is only a bandaid fix, and does not add proper time zone handling to version 5.xx .
