NAME

git−lfs−post−merge – Git post−merge hook implementation

SYNOPSIS

git lfs post−merge *is_squash*

DESCRIPTION

Responds to Git post−merge events. It makes sure that any files which are marked as lockable by **git lfs track** are read−only in the working copy, if not currently locked by the local user.

SEE ALSO

git−lfs−track(1)

Part of the git−lfs(1) suite.
