NAME
tipc-socket – show TIPC socket (port) information

SYNOPSIS
tipc socket list

OPTIONS
Options (flags) that can be passed anywhere in the command chain.

−h, **--help**
> Show help about last valid command. For example **tipc socket --help** will show socket help and **tipc --help** will show general help. The position of the option in the string is irrelevant.

DESCRIPTION
A TIPC socket is represented by an unsigned integer.

Bound state
> A bound socket has a logical TIPC port name associated with it.

Connected state
> A connected socket is directly connected to another socket creating a point to point connection between TIPC sockets. If the connection to X was made using a logical port name Y that name will show up as **connected to** X **via** Y

EXIT STATUS
Exit status is 0 if command was successful or a positive integer upon failure.

SEE ALSO
tipc(8), **tipc-bearer**(8) **tipc-link**(8), **tipc-media**(8), **tipc-nametable**(8), **tipc-node**(8),

REPORTING BUGS
Report any bugs to the Network Developers mailing list **<netdev@vger.kernel.org>** where the development and maintenance is primarily done. You do not have to be subscribed to the list to send a message there.
