NAME
ubuntu−report − Report metrics from your system, install and upgrades

SYNOPSIS
ubuntu−report [flags]

DESCRIPTION
This tool will collect and report metrics from current hardware, partition and session information. This information can't be used to identify a single machine and is presented before being sent to the server.

OPTIONS
−f, **−−force**[=false]
   collect and send new report even if already reported

−h, **−−help**[=false]
   help for ubuntu−report

−u, **−−url**=" ⟨https://metrics.ubuntu.com"⟩
   server url to send report to. Leave empty for default.

−v, **−−verbose**[=0]
   issue INFO (−v) and DEBUG (−vv) output
