NAME

Glib::Boxed – Generic wrappers for C structures

DESCRIPTION

Glib::Boxed is a generic wrapper mechanism for arbitrary C structures. For the most part you don't care about this as a Perl developer, but it is important to know that all Glib::Boxed descendents can be copied with the `copy` method.

HIERARCHY

```
Glib::Boxed
```

METHODS

copy_of_boxed = `$boxed`–>**copy**

Create and return a new copy of *$boxed*.
